Re: Camp Street Water and Sewer Replacement Project  
City of Platteville, Wisconsin

Dear Property Owner,

Following is an update regarding the Camp Street Water and Sewer Replacement project as provided by the City's contractor, Rule Construction:

- On **Wednesday, September 3<sup>rd</sup>** the intersections of Camp and Lancaster and Camp and Elm will be repaved. The temporary asphalt curbs, sidewalks, and driveways will also be installed. There will be periodic traffic interruptions, but you will be able to access the street most of the day. Please do not park any vehicles on the street.
- On **Thursday, September 4<sup>th</sup>** the gravel portions of the street will be chip-seal coated. The chip sealing operations will prevent all traffic from using the street until the chip seal has cooled down, which will be by the end of the workday (approximately 5 pm). Therefore, you will need to remove your vehicle from your driveway and from the street by no later than 7 am and plan on not being able to access your home with a vehicle until 5 pm. (You will be able to walk to your residence, but we recommend not walking across the new chip seal until it has cooled.)

As mentioned above, we kindly request that you refrain from parking vehicles on the street during construction. If you must park on the street, please have your vehicle moved by 7:00 am.

We realize that there may be special access needs during the construction. Please contact us as soon as possible if you have special access needs.

Should you have any questions or require further information, please feel free to contact the project manager, Dan Dreessens of Delta 3 Engineering, Inc., at (608) 348-5355, ext. 1002 or via email at [dreessensd@delta3eng.biz](mailto:dreessensd@delta3eng.biz).

Thank you,
